Connecting communities to the future

Blue Sky

- Pacific Power has funded over 100 new community-based renewable energy projects in Oregon over the past 15 years.
- Funding awards cover up to 100 percent of the capital costs to install qualified, new renewable energy systems.
- Projects that provide strong environmental, economic, and educational benefits are more likely to be awarded a grant.

Community Based Renewable Energy - Pilot

- **TECHNICAL ASSESSMENTS**: Provide feasibility studies to communities interested in better understanding the costs and requirements of solar and battery energy storage systems at critical community facilities.
- **ONGOING PROJECT SUPPORT**: Leverage expertise and provide supplemental funding to support the planning for, and installation of, the battery storage component of planned and existing resilience projects to provide grid-enabled system-wide benefits and learning outcomes
- **GRANT MATCHING**: Establish a mechanism to provide matching funds for communities seeking external grant awards for resilience projects at critical facilities
